

WHAT WAS THE IMPACT OF SPSASSD ON YOUR WORK?

This Round Table, chaired by Didier Demolin, features the foreign DINAFON 2014 invited speakers who were on faculty in São Paulo School of Advanced Studies in Speech Dynamics in 2010, namely: Alice Turk, Ioana Chitoran, John Kingston, and Khalil Iskarous. Each will have 20 minutes to give a testimony of the fruits of the school for the speech dynamics scientific community, including its effects on his or her own work. The theoretical question at stake is whether an approach focused on articulatory gestures can be integrated to an approach focused on auditory and/or multimodal speech perception.
